

IT'S ABOUT LIFE.

St. Joseph's Hospital and Medical Center's Weekly News Bulletin

News for the Week of July 23, 2007

On the Cover

The work of two of St. Joseph's finest is about to grace the cover of *Scientific American*. Susana Martinez-Conde, Ph.D., director of the Laboratory of Visual Neuroscience at Barrow, and Stephen Macknik, Ph.D., director of the Laboratory of Behavioral Neurophysiology at Barrow, are featured in the August issue of the magazine for their research on fixational eye movement.

This is an enormous honor. *Scientific American*, the oldest continuously published magazine in the U.S., has been bringing its readers unique insights about developments in science and technology for more than 150 years. The magazine publishes 15 foreign language editions and has more than one million copies in circulation. Congratulations to Drs. Martinez-Conde and Macknik!

Thanks for the Feedback

The recent employee focus groups that sought staff input and feedback about parking and commuting were very successful. Thank you to everyone who took time out of their busy schedules to share their opinions and suggestions. The feedback from these groups is being tabulated and will be used to create new parking and commuting programs. Watch for communications about focus group results in the coming weeks.
